EVELIN MANOJ

React.js Developer | Software Engineer
+91 7025691031 | evelinmanoj@gmail.com | www.linkedin.com/in/evelin-manoj | Thrissur, India

PROFESSIONAL SUMMARY

React.js and Next.js developer with experience building responsive web applications, reusable UI components and RESTful API integrations, including handling asynchronous data flows. Skilled in CSS/SASS styling, front-end testing and code reviews. Experienced in replatforming legacy AS/400 applications to Google Cloud Platform and in Agile project environments. Uses AI-assisted tools (GitHub Copilot, Claude, Gemini) to speed up code comprehension and documentation. Strong problem-solving, communication and cross-functional teamwork skills.

TECHNICAL SKILLS

Front-End: React.js, Next.js, HTML, CSS/SASS, Responsive Web Design, Reusable UI Components

APIs & Data: RESTful APIs, Asynchronous Data Flows, PostgreSQL, Postman

Back-End & Languages: Node.js, Python (Django), Java, Springboot, .NET, C, C++, AS/400

AI & Productivity Tools: GitHub Copilot, Claude, Gemini

PROFESSIONAL EXPERIENCE

Developer II - Software Engineer **Present (2024-2026)**
UST, India

- Supported the replatforming of legacy AS/400 applications to Google Cloud Platform, including vendor maintenance, NSI and sales modules, by analyzing business logic and mapping dependencies across upstream and downstream systems.
- Contributed to requirement analysis, user flows and integration planning in design discussions for a modern web system built on Next.js.
- Used AI-assisted tools (GitHub Copilot, Claude, Gemini) to speed up code comprehension, validate business rules, and draft technical documentation and solution designs.
- Performed impact analysis for application changes and validated functional specifications, user stories and acceptance criteria in Agile sprints.
- Prepared process flows, functional documentation and knowledge-transfer materials to support project delivery and long-term maintenance.

Senior Systems Engineer **2021-2022**
Infosys Ltd., Trivandrum

- Developed and maintained responsive front-end features for a virtual internal auditing application using React.js, building reusable UI components for a consistent user interface.
- Integrated RESTful APIs to connect front-end views with back-end services, handling asynchronous data flows and ensuring accurate data rendering across audit workflows.
- Diagnosed and resolved front-end bugs across the application, improving stability and user experience.
- Wrote and executed front-end tests to validate UI behavior and catch regressions early in the development cycle.
- Participated in code reviews, providing feedback to maintain code quality and share best practices across the team.
- Styled components using CSS/SASS to ensure a clean, maintainable and visually consistent interface.
- Collaborated with cross-functional teams during pre-project analysis and technical assessments to plan UI architecture decisions.

EDUCATION

M.Tech in Computer Science and Engineering - Government Engineering College, Thrissur (2022-2024)
B.Tech in Computer Science and Engineering - Vidya Academy of Science and Technology, Thrissur (2017-2021)
